

Portable Event Surveillance Powered by Fortem SkyDome™

Wireless Situational Awareness, Safety, Security and Surveillance for Events

Ground and airspace awareness for security professionals in live event situations. Secure your live events by monitoring the airspace over and around them. The Portable Surveillance system will identify aerial threats or hazards as they enter your defense perimeter. Fortify your security solutions by expanding your coverage area and offering real-time notifications. Pursue an aerial threat, stream video and even mitigate by moving threats to a safe location for inspection and analysis. Portable Surveillance is powered by SkyDome and the military hardened Fortem TrueView™ radar platform.

Benefits

- Extend reach and effectiveness of your security plan
- Detect, observe, pursue and mitigate threats from a secure location
- Identify exact location, speed, direction and altitude of ground or airborne threats from long distance
- Enable rapid response with early warning of potential threats via audible notification, text or email messages
- Confirm unauthorized ground and drone activity hotspots with real-time data

Features

- Military hardened, portable, wireless system that weighs less than 15 lbs.
- Quickly set up and operate in less than three minutes without any radar expertise
- Intuitive interface that detects and tracks all objects (people, drones, planes, vehicles, etc.), minimizing false positive and user error
- Precision tracking day or night and in all weather conditions
- Mount on a tripod, vehicle roof, truck bed or hitch
- 10-hour battery life with multi-battery capability

Powered by SkyDome

SkyDome is a comprehensive platform for airspace and ground awareness, safety and security that provides events with complete coverage, safe integrated response options, and powerful, easy-to-use software - without the need for any extensive training.

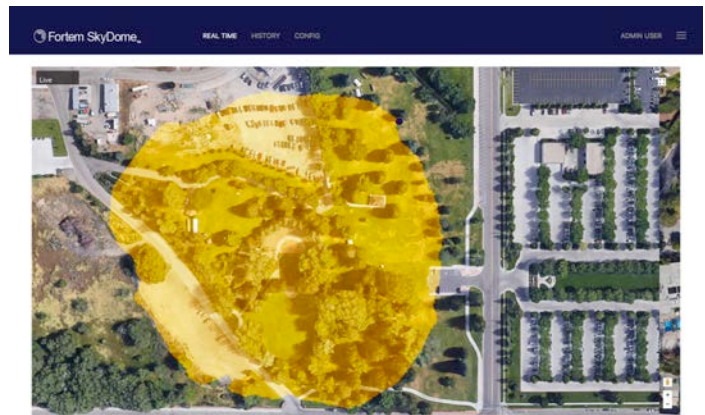

SkyDome operates with TrueView radar, which uses AI-enabled detection and classification technology to provide complete situational awareness during an event, day or night, and in all weather conditions. Objects are displayed on an easy-to-use interface which allows security professionals to safely assess threat levels. If further action is required, then pursuit or mitigation action can be taken real-time.

Specifications

Tripod Height	Extendable between 5' (1.5 m) and 8' (2.4 m)
Fortem TrueView™ R20 Radar Field of View	120° elevation x 40° azimuth
Operating Temperature	-40° F to 122°F (-40°C to 55°C)
Monitors	Ruggedized mobile or fixed
Battery Life	10+ hours
Communication	Wireless
Setup Time	Less than 3 minutes

Options

Mount Options	Tripod, bed, hitch or roof rack
Charging	Cigarette lighter or battery
Fortem DroneScout™	Pursues, intimidates and streams video of unauthorized objects in airspace
Fortem DroneHunter™	Pursues and captures objects in airspace

SkyDome real-time view interface. Set up zones and monitor activity within the defined space.

Tracking information and SMS notification.
